**Subject:** Low Income housing

Hi Nancy, I have been a Realtor since 1986. In this time I have seen many hard working people leave Florida, because housing is not affordable for them. This list includes computer techs, artists, many people related to the building trades including builders, nurses, etc. After being priced out of housing they migrated to Georgia, Tennessee, North and South Carolina, and Texas where there is affordable housing. There is a Florida fund for housing(would love to see it audited!); this could be used to help follow the trend of SMALL HOUSES. If land was purchased out of this fund Florida workers could have ownership of a small house. Has this option been explored? Thank you.
