Small County transactions, particularly those in counties that have been designated as having significant economic hardship, should be eligible to receive up to \$1,000,000 of funding from this RFA. As it reads now, the per unit cap would significantly reduce the amount granted to one of these deals. Building in these areas is difficult for a number of reasons. Florida Housing's assistance on this matter would be a tremendous step to ensure future Small County transactions are viewed as viable by the development community.

Thank you.
