**Subject:** RFA 2018-101

Bill....im in Tampa again today for developer training from fl housing for non profits. Why would this RFA ask for the non profit to already have 2 fl housing approved developments completed, knowing that the for profit developers who have this experience decline to participate in these small RFAs? Can this RFA provide an alternative to this requirement? For example -can the developer qualify with other affordable housing experience such as for profit affordable experience or receiving NSP funds or experience in other states? The non profits attending todays training lack this proposed RFA requirement!
