Subject: 2023 GEO RFA's

According to the draft RFA provided with the June 6, 2023, Workshop a revised zoning approval form will be required with the application as well as a site plan approval form from 7-2022. I would like to suggest a slight modification of the wording for the site plan approval form. In its current form, the last sentence of Paragraph 2(ii) reads, "Although there is no preliminary or conceptual site plan approval process and the final site plan approval has not yet been issued, the site plan, in the applicable zoning designation, has been reviewed." I would like to suggest that "preliminary or conceptual" be inserted as follows: Although there is no preliminary or conceptual site plan approval process and the final site plan approval has not yet been issued, a preliminary or conceptual site plan, in the applicable zoning designation, has been reviewed.

Without this change, a county or municipality can require full site plan requirement to sign the form.

Thank you for your consideration.

John Saxton
